A results-driven Software Engineer with over 2 years of industry experience, seeking a challenging role in a forward-thinking organization. Committed to utilizing my skills and knowledge to contribute effectively to the company's success while continuously expanding my expertise and professional growth.

WORK EXPERIENCE

Assistant Manager, Thomas Cook India Limited (2021 - 2023)

- Spearheaded the maintenance and development of 5+ new projects and integrations related to **Forex Product**, ensuring seamless operations and enhancing market competitiveness.
- Led the end-to-end implementation of the **ForexMate Product** from inception, overseeing the creation and deployment of all components and features, resulting in a successful launch and market penetration.
- Executed duties as the **Release Manager**, overseeing successful production releases every week and ensuring seamless deployment processes while adhering to strict timelines and quality standards.
- Involved in the development of the **Visa module** from its inception, steering its creation and evolution to meet regulatory standards, resulting in enhanced transactional efficiency and customer satisfaction.
- Engineered tailored solutions for **8 distinct Payment module** requirements, optimizing transaction processes and ensuring seamless financial operations.
- Collaborated on integration projects with **2 vendors for the Hotels Product**, revamping the complete Hotel Portal, enhancing functionality.
- Enhanced the performance of the Flights module by approximately **60%**, implementing optimizations and integrating **2 new airline vendors**, resulting in improved efficiency and expanded flight options for users.
- Developed an intuitive **Admin portal**, incorporating Role-Based Access Control (RBAC), streamlining the sales and Administration workflow.
- Played a key role in the development process of **2 white-labelled projects** focusing on the Visa and Forex modules, greatly reducing implementation time for SOTC-specific implementation.
- Built innovative **Holiday and Dynamic Holiday Packaging** modules in close collaboration with key stakeholders leading to great market reception.
- Actively participated in technological upgrade projects centered on technologies such as **Spring Boot, Java 11, Tomcat 10.1.x, and ReactJS**.
- Worked on accounts-based integration project – **Canvas**, generating insightful reports enabling informed decision-making.
